PROFESSIONAL SUMMARY

Senior Mobile Engineer with 7+ years of experience building production iOS and cross-platform applications using Swift, Flutter, and Kotlin. Strong expertise in Bluetooth Low Energy and IoT integrations, modular mobile architecture, real-time systems, and end-to-end product delivery across POS, healthcare, F&B, and connected devices.

CORE EXPERTISE

Mobile Swift, Objective-C, UIKit, SwiftUI, Combine, Flutter, Dart, Kotlin, Java	Architecture MVVM, Clean Architecture, VIPER, modularization, TDD, code review
Connected Apps BLE, IoT SDKs, REST APIs, WebSocket, JSON, OAuth	Delivery GitHub Actions, GitLab CI, Fastlane, TestFlight, App Store Connect

PROFESSIONAL EXPERIENCE

Senior Mobile Engineer (iOS / Flutter) Butterfly Global Pte Ltd

Nov 2023 - Apr 2026
Singapore

- Owned and scaled an iOS POS system for real-time, multi-device restaurant operations.
- Refactored legacy code into modular UIKit and MVVM architecture, improving load time by 40-60%.
- Improved API and WebSocket performance, reducing synchronization latency by 20-30%.
- Managed production releases and partnered with backend, product, and design teams end to end.

Flutter Lead Engineer (IoT) SEI Asia Sdn Bhd

Dec 2025 - Mar 2026
Malaysia - Freelance

- Led a Flutter IoT application integrating smart watches and smart door locks over BLE and Wi-Fi.
- Collaborated with hardware teams in Shenzhen to build, test, and integrate device SDKs.
- Improved debugging efficiency by 2-3x and refactored legacy code into maintainable modules.

Mobile Application Developer (IoT) PT Karadigital Solusi Indonesia

May 2023 - Nov 2023
Indonesia

- Developed BLE modules in Swift, Objective-C, Kotlin, and Java for watches and fitness devices.
- Improved BLE connection stability by approximately 25-35% and bridged native iOS modules to React Native.

PROFESSIONAL EXPERIENCE - CONTINUED

iOS Developer

PT Sehat Digital Nusantara (AlteaCare)

Feb 2022 - Feb 2023
Indonesia

- Built a centralized analytics layer and scalable AppsFlyer deep-linking system.
- Improved maintainability and monitored production quality with Crashlytics and Instruments.

Mobile Application Developer (iOS / Flutter)

PT Infotech Solutions

Feb 2021 - Feb 2022
Indonesia

- Delivered production Swift, SwiftUI, Combine, UIKit, and Flutter applications for international clients.
- Built REST integrations and applied scalable architecture from initial development through store releases.

iOS Developer

PT Buana Varia Komputama - Kimia Farma

Feb 2020 - Feb 2021
Indonesia

- Led healthcare features including OCR prescription and Indonesian ID card scanning.
- Reduced manual input by 40-50% and improved onboarding efficiency by approximately 30%.

Android Developer

PT Infolab Digital Solutions

Jan 2018 - Jan 2020
Indonesia

- Developed Android applications in Java and Kotlin, including the Undangin event platform.
- Worked with design and backend teams from concept through testing and production delivery.

EDUCATION

World Class Developer Program

Apple Developer Academy @ BINUS

2019 - 2020
Indonesia

- Competitive full-scholarship program focused on iOS product development and App Store delivery.

Bachelor of Computer Science - Cum Laude

Universitas Bengkulu

2010 - 2015
Indonesia

- GPA 3.52 / 4.00; HIMATIF division coordinator.

SELECTED IMPACT & PROJECTS

Impact

60% faster load time
20-30% lower sync latency
100k+ product users
Best Paper award

Selected products

Butterfly POS and BYOD
Pininfarina Hybrid Watch
Starbucks Card iOS
Kimia Farma iOS
HIA Lifeline and Hygear
